To enable Shared Network watch list in pulse
You will need to install Pulse ver 3.7.54.0 or higher

Once installed and logged in click Tools then Options

Expand Symbols and select Grouplists
Make sure that enabled is ticked

Enter the drive letter or the network path along with a filename in both From and To fields
This network location is a single repository for all your shred watchlists

And click ok

To create a new watchlist on Pulse anywhere on screen
Right mouse click, new, watch list and enter

You are now presented with a blank watch list

WatchList [New19]

Code Name Status Last Change % Change IAP IAP Change IAP % Change Surplus Volume VWA

Enter the codes ie BHP and hit enter repeat until complete

Now you must save the shared watch list

Click on the save button

Click As Symbol List and click Group
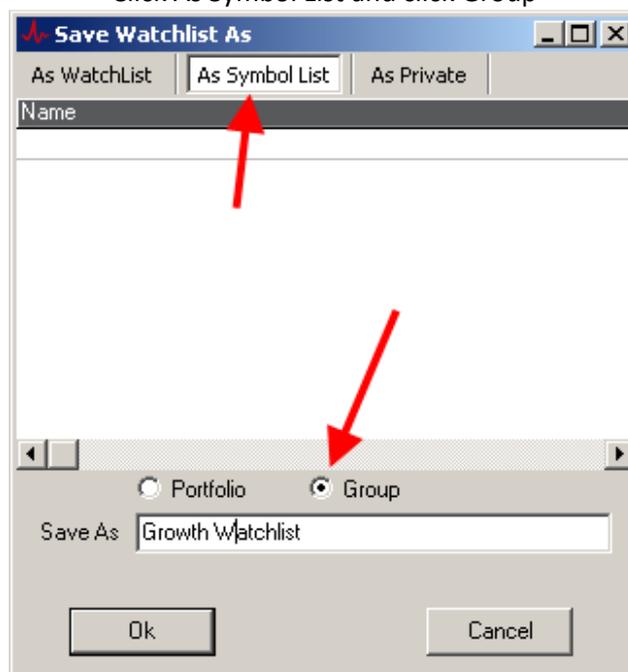

Enter a name for the watch list and click ok

This process can be repeated over to create several watch lists

Once all watch lists are created you have to publish to the network drive

click Tools then Options

Expand Symbols and select Grouplists
Click Publish Now and then Click Ok

Adding any new symbols to an existing group watch list will be auto saved, but for others to see the change you will have to publish and other users will have to log off pulse and log back in for the changes to be reflected in there terminals…

Each computer that needs to access the shared watch lists must have the same network path set in the local version on pulse
if you do not want the secondary users to publish / change the group watchlist remove tick from enabled and click ok

to select the group watch list click on the open icon

Select Symbol List and filter by Group
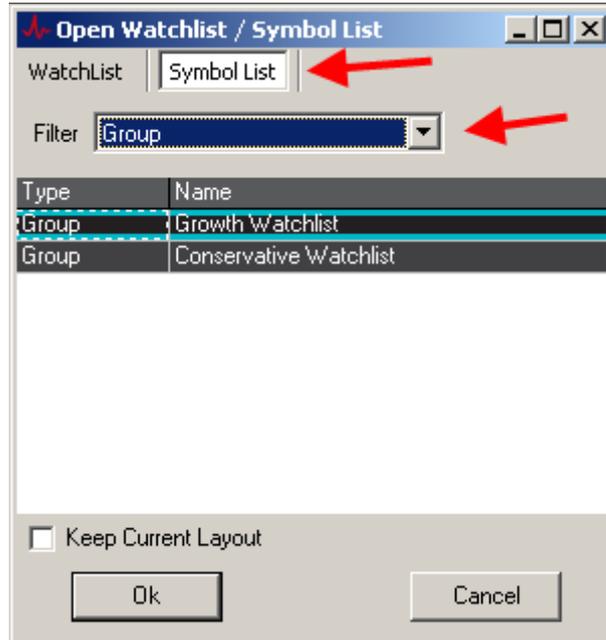

Now highlight the name of the watch list and click ok

The group watchlist is now displayed in pulse

Once positioned on screen you need to save the desktop so that it will open each time in that view

Top centre of the pulse screen click the save icon

Save as the name that is pre populated or type your own layout name and click ok

Pulse will now start in this layout on next login.
